

Evgeny Gervis is CEO of SafeLogic, a premier cryptographic software company with products and managed services that enable organizations to accelerate and simplify adoption of FIPS 140 validated classical and post quantum cryptography. Prior to SafeLogic, Evgeny had been involved in software security for almost two decades, holding a range of technical to leadership roles at Synopsys' Software Integrity Group (SIG), Cigital (acquired by Synopsys), and Secure Software (acquired by Fortify Software). Evgeny is deeply involved with NIST's PQC Migration project where he is an active industry collaborator and Risk Management and Prioritization Workstream lead. Evgeny holds a B.S. in Computer Science from the University of Virginia, M.S. in Computer Science from Johns Hopkins University, and an MBA from Georgetown University.
